**(54) BACKUP SYSTEM FOR FILING SYSTEM**

**(57) Abstract:**

**PURPOSE:** To enable speedy recovery in respect to fault generation and wrong operations by selecting a file updating contents and copying it to a file system for backup within prescribed time after the passage of prescribed time when backup is executed the last time.

**CONSTITUTION:** The timer means of a CPU 3 counts time after the last time backup processing and when the lapse of prescribed time is judged, it is announced to a file selecting means not shown in the figure. The file selecting means extracts the data of operational history preserved in a file 4 and selects the file updating the contents by the correcting operation of the file within prescribed time. Then, the selected file is copied onto a file system 2 for backup.
